

Spring (Mid-May)

Fertilizer: with **Nutrite Spring Lawn Fertilizer 21-0-9**
Overseed: to thicken lawn with **Connon Quick Overseed**
(or if you have less than 5 hours of sun use **Connon Super Shade Grass Seed**)
Weed Control: (DO NOT APPLY WEED CONTROL AND GRASS SEED IN THE SAME SEASON)
Crabgrass: To reduce crabgrass **Turf-Shark Corn Gluten 9-0-0** can be applied as a pre-emergent
Broadleaf Weeds: (Dandelion) Use **Scotts Weed-B-Gon**, two application required
Insects: Spring Grubs, Use **Scotts Grub-B-Gon**

Early Summer (Late-June)

Fertilizer: with **Nutrite Summer Lawn Fertilizer 18-0-12**
Weed Control: Use **Scotts Weed-B-Gon**
Insects: Grubs, Use **Scotts Grub-B-Gon**

Late Summer (Early-Mid September)

Aerate (core aeration is best)
Top dress with compost **Turf-Shark Granular Compost Top Dressing**
Overseed: to thicken lawn with **Connon Quick Overseed**
(or if you have less than 5 hours of sun use **Connon Super Shade Grass Seed**)
(This is the best time of year to apply grass seed – especially under trees)

Fall (Mid-October)

Fertilizer: with **Nutrite Fall Lawn Fertilizer 10-0-15**

Mowing

- Mowing height 3 to 3½ inches
- Little longer in the summer
- Checked mower blade regularly
- Sharpen the blade after 20 hours of mowing (at least annually)

Watering

- 2.5 cm (1") per week
- Every 5 – 7 days
- Mornings are best

Getting the most from your grass seed

- Timing
 - September is best
 - 10° C Soil temperature for germination
 - Mid to late May
- Water
 - 15 minutes daily for 3 weeks
 - Twice a day in hot weather
