

Lawn Care Basics

Spring (Mid-May)

Fertilizer: Nutrite Spring Lawn Fertilizer 21-0-9

Overseed: To thicken lawn with Connon Quick Over-Seed

Less than 5 hours of sun? We recommend Connon Super Shade Grass Seed

Weed Control: DO NOT APPLY WEED CONTROL AND GRASS SEED IN THE SAME SEASON

Crabgrass: To reduce crabgrass, Nutrite Weed Seed inhibitor can be applied as a pre-emergent

Broadleaf Weeds: (Dandelion) Use Scotts Weed-B-Gon; two applications required

Grubs: Apply Scotts Grub-B-Gon in spring

Early Summer (Late-June)

Fertilizer: Nutrite Summer Lawn Fertilizer 18-0-12

Weed Control: Use Scotts Weed-B-Gon

Insects: Grubs, Use Scotts Grub-B-Gon

Late Summer (Early-Mid September)

Aerate: Core aeration is best

Top dress: Use compost such as Turf-Shark Granular Compost Top Dressing

Overseed: To thicken lawn with Connon Quick Over-Seed

Less than 5 hours of sun? Use Connon Super Shade Grass Seed

*This is the best time of year to apply grass seed – especially beneath trees

Fall (Mid-October)

Fertilizer: Nutrite Fall Lawn Fertilizer 10-0-15

Mowing

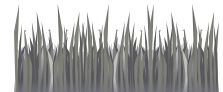

- Mowing height 3 to 3½ inches
- Little longer in the summer
- Checked mower blade regularly
- Sharpen the blade after 20 hours of mowing (at least annually)

Watering

- 2.5 cm (1") per week
- Every 5 – 7 days
- Mornings are best

Seeding

- Mid to late May or September is best
- 10° C Soil temperature for germination
- Water new seed 15 minutes daily for 3 weeks
- Twice a day in hot weather
